

MATERIAL SAFETY DATA SHEET

PREPARED - APRIL 2013

Product Identification Product Name: LANOBASE 23 ID#51314 Consumer Commodity, ORM-D Proper Shipping Name: Product Use: ARTERIAL EMBALMING FLUID **EMBALMING CHEMICAL (MIXTURE) Chemical Family: B2, D1A D2B** Whmis Classification: Flammable Liquid, Class 3 N.O.S.: 3 UN1993 PKG. III (Methanol, Formaldehyde) **TDG Hazard Class:** Limited Quantity II. Hazardous Components Air Limits Substance Case # Percent PPM Nature of Hazard TWA (8 hr) Irritant, sensitizer, poison, Formaldehyde50-00-0 20 .75 ppm TWA (15 mín) 2 ppm potential carcinogen Action Level (TWA, 8 hr) 0.5 ppm IDLH Level 100 ppm Methanol (methyl alcohol)......67-56-1 6 TWA (8 hr), skin 200 ppm; 260mg/m3 Flammable, poison TWA (15 min) 250 ppm; 310mg/m3 **III. Physical Data** Specific Gravity: Greater than 1 Odor: Pungent IV. Fire and Explosive Hazard Data Flash Point:181°F Flammable Limits:......Lower - 7%, Upper - 73% (Formaldehyde) Extinguishing Media:Foam, CO2, Water Spray, Dry Chemical Fire Fighting Procedure:Spray containers with water to cool them. Stay upwind and avoid smoke or fumes, or use an air supply, gogles and protective clothing. Special Fire Hazards:Vapors heavier than air can travel to a source of ignition and flash back. Formaldehyde can oxidize with air and heat to give corrosive formic acid fumes. V. Reactivity Data Stability:Stable VI. Health Hazard Data Effects of Overexposure: EYES - Can cause severe irritation or burns. SKIN - Can cause severe irritation of burns. SKIN - Can cause severe irritation, hardening or cracking of the skin and allergic dermatitis. IF INHALED - Highly irritating; may cause inflammation of nose, throat and lungs. IF SWALLOWED - Poisonous. Causes pain, vomiting, etc. Ingested methanol can cause blindness. CARCINOGEN - Formaldehyde is listed by NTP and IARC. Repeated and prolonged exposure increases the risk. See the OSHA Formaldehyde Standard, 29 CFR 1910.1200 for additional information including monitoring and medical surveillance. Action Level = 0.5 ppm. Emergency/First Aid:EYES - Flush immediately with water. Remove contact lenses; continue flushing at least 15 minutes, occasionally lifting lids, until no evidence of formaldehyde remain. SKIN - Remove any contaminated clothing. Wash well with soap and water until no evidence of formaldehyde remains. INGESTION - Give the victim two glasses of water and then induce vomiting by inserting two fingers to the back of the throat. Following the vomiting, give water, milk or activated charcoal slurry. Never give anything by mouth to an unconscious person. INHALATION - Move the victim to fresh air. In high vapor concentrations any rescuer must wear self-contained breathing apparatus. VII. Spill or Leak Procedures and move to hood or remove in a labeled, covered container. Neutralize spill residue with dilute (5%) solution of ammonia, sodium sulfite or sodium bisulfite and remove. Flush area with plenty of water. Waste Disposal Method:Comply with federal, state and local regulations for the disposal of chemical waste. If approved, flush down drain. Incinerate solid absorbents. **RCRA Hazardous** VIII. Special Protection Information Eye Protection:Splash goggles are recommended. for a limited time. For longer exposure or higher levels use positive pressure or self-contained apparatus. IDLH Protection:Levels of 100 ppm or more are immediately dangerous to life and health. Entry into an IDLH atmosphere requires

The information on this Material Safety Data Sheet (MSDS) has been compiled from 29 CFR 1910.1200, supplier MSDS, other technical references and our testing and experience. Users are responsible for determining the suitability of this product and information for their circumstances and for knowing of and complying with all pertinent federal and state regulations.

full body protection with self-contained air supply or a positive pressure air line supply.
